

## Rozgé Cosmeceutical - Company Profile

Here at Rozgé Cosmeceutical our mission is to be innovative in the world of health and beauty products. Our expert scientists, with many years of experience in product formulation and manufacturing, offer more than production, they offer experience as well as knowledge of the industry.

Our lab contains the latest in research and development science and equipment. At Rozgé our scientists strive to meet the demands of our clients to produce the highest quality custom formulations and/or duplicate existing products. Our onsite quality control and R&D laboratory allows for faster production in our cGMP and FDA approved manufacturing facility.

Our staff is ready to assist you with:

- Research and development
- Unique & specific formulations
- Product duplication & improvement
- Marketing consultation
- Regulatory insight

At Rozgé Cosmeceutical, we hold ourselves to a higher standard.

### Quality Control

We don't just manufacture products, we manufacture with strict control and quality. Our laboratory is outfitted with the latest equipment to perform all the required testing protocols set by the government licensing agencies. All products manufactured must adhere to cGMP protocols.

These standards, set by the FDA require that proper controls are in place for manufacturing so processing in a consistent manner, and meets quality standards is done.

The requirements include provisions related to:

- Construction of physical plants that facilitate maintenance
- Proper manufacturing operations including cleaning
- Quality control procedures
- Testing of incoming and in process materials
- Testing final product

- Maintaining records

Because our commitment to quality extends beyond formulating and manufacturing, our staff is dedicated and involved in every aspect of your project. From development to manufacturing, filling and packaging, we provide ongoing training and quality awareness.
